# 1. Installation

---

## WordPress Installation

Before installation you must have a working version of WordPress already installed. For further information regarding WordPress platform installation, please refer to the WordPress Codex:

[http:// codex.wordpress.org/Installing WordPress](http://codex.wordpress.org/Installing_WordPress).

## Theme Installation

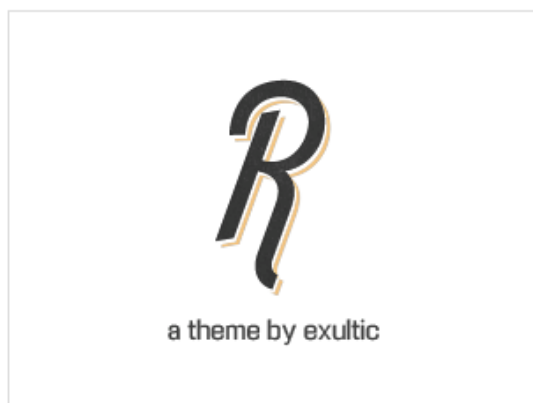

When ready to theme installation process:

1) Upload theme files and then activate the theme itself.

- Two methods for theme files upload:

- FTP Upload: Using your FTP program, upload the non-zipped theme folder into the /wp-content/themes/ folder on your server.
- WordPress Upload: Navigate to "**Appearance > Add New Themes > Upload**". Go to browse, and select the zipped theme folder. Hit "Install Now" and the theme will be uploaded and installed.

2) After uploading, you need to activate it: Go to "**Appearance > Themes**" and activate the theme.

## 2. Theme Features

---

### 2.1 Theme Options

This theme includes an Options Panel where you can customize the theme's default settings and options. You can access it by navigating to **"Appearance > Theme Options"**.

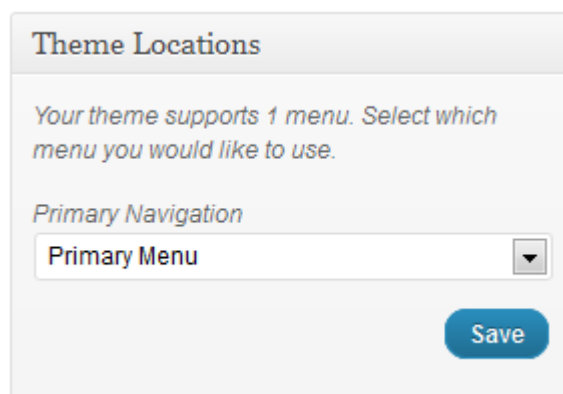

### 2.2 Custom Menus

To create a menu or attach an existing menu to the theme, go to **"Appearance > Menu"**.

A screenshot of the 'Create Menu' form in WordPress. At the top left, there is a small tab with a plus sign and four dots. Below it, the label 'Menu Name' is followed by a text input field containing the placeholder text 'Enter menu name here'. On the right side of the form, there is a blue button with the text 'Create Menu', which is circled in red.

Attach the menu to the theme by setting the menu location.

A screenshot of the 'Theme Locations' panel in WordPress. The panel has a title 'Theme Locations' and a subtitle 'Your theme supports 1 menu. Select which menu you would like to use.' Below this, there is a section titled 'Primary Navigation' with a dropdown menu. The dropdown menu is currently set to 'Primary Menu'. At the bottom right of the panel, there is a blue button with the text 'Save'.

## 2.3 Custom Widgets

This theme includes 6 custom widgets. You can access them by navigating to "**Appearance > Widgets**".

- **Flickr Widget** – Show off your Flickr photos. You can get your Username and API Key here [http://flickr.com/services/api/misc.api\\_keys.html](http://flickr.com/services/api/misc.api_keys.html).
- **Most Commented Posts Widget** – Display most commented posts on your blog.
- **Most Liked Posts Widget** – Display most liked posts on your blog.  
\* This widget is displayed in widgets panel only if post rating system is enabled.
- **Post Formats Widget** – Display a list or dropdown of post formats.
- **Social Profiles Widget** – Display links to your social media profiles.
- **Latest Tweets Widget** – Display your latest tweets.

## 2.4 Custom Page Templates

This theme includes several page templates. These templates can be used on individual pages to alter the display or functionality.

- **Full-Width Page Template** – Display your page full-width without sidebar.
- **Sitemap Template** – Use this template to create a sitemap for your blog.
- **All Audio Template** – Use this template to create a playlist of all the audio attachments uploaded to your blog.

## 2.5 Post Formats
